### **DETAILED ACTION**

#### Election/Restrictions

1. Applicant's election with traverse of Figure 6 in the reply filed on 9/26/2005 is acknowledged. The restriction is withdrawn. All of the claims are examined below.

### Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the comb drive of claim 30 must be shown or the feature canceled from the claim. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

Art Unit: 2834

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 30 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention. The specification does not disclose a full, clear, concise, and exact written description of a comb drive with an electrostatic shield.

## Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2834

6. Claims 1-9, 11, 17, 21, 22, 28, 30, and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Rodgers et al. (Rodgers)(US 6133670). Rodgers teaches a dielectric substrate 18 having comb electrodes 12 with an electrostatic shield 40 positioned in the gap between the electrodes 12 and connected to the ground potential. The shield 40 having a rectangular cross section.

Claims 4-9 are method of making limitation that are not germane to the patentability of the apparatus.

- 7. Claims 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsukamoto (US 6231413). Tsukamoto teaches a dielectric substrate 1 having electrodes 2,3 with a conductive film positioned on the electrodes in the gap between the electrodes, where the film inherently serves as an electrostatic shield.
- 8. Claims 1-10, 12, 14, 17-21, 23, 25, 28, 30, 31, and 32 are rejected under 35 U.S.C. 102(e) as being anticipated by Ishii et al. (Ishii)(US 6912336). Ishii teaches an electrostatic optical oscillator having a pair of electrodes 141 on a dielectric 105, where the electrodes have non-insulating material (metal/rectangular plates) 140 on the electrodes and adjacent the gap between the electrodes, which inherently act as an electrostatic shield during operation of the optical switch. The metal layers is formed by stacking metal plates. Ishii teaches the electrostatic shield extending normal (perpendicular) to the surface of the dielectric, where figure 1A shows the height of the metal layer 140 is greater than the spacing between the electrodes 141.

Art Unit: 2834

Claims 4-9 are method of making limitation that are not germane to the patentability of the apparatus.

## Allowable Subject Matter

- 9. Claims 13, 15, 16, 24, 26, 27, and 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl I.E. Tamai at telephone number is (571) 272 2036.

The examiner can be normally contacted on Monday through Friday from 8:00 am to 4:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Darren Schuberg, can be reached at (571) 272 - 2044. The facsimile number for the Group is (571) 273 - 8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
